EXPERIENCE

Freelancer   **Upwork**   **Jan 2023-Present**

- I was doing some DevOps and some touch ups on websites. Came across a shopify site already done and helped implement some additional features into it.

Mobile Expert   **T-mobile**   **Aug 2020-Present**

- Opening and closing the store on a daily basis.
- Responsible for planogram changes balancing the registers at the end of day and making nightly deposits.
- Sales representative for new and existing accounts, selling T-mobile products and services.
- Utilizing a tool system for finding ways to get business accounts.

Retail Sales Representative   **Sprint**   **Dec 2018-Aug 2020**

- Open and close the store on a daily basis..
- Responsible for balancing the registers at the end of day and making nightly deposits.
- Sales representative for new and existing accounts, selling Sprint products and services.

PROJECTS

DJ Karaoke Website   [Repository](#)

- I redesigned a website that was lackluster and has a way for singers to sign in and add songs to sing
- Utilized Javascript, React.js Axios, Python, Django REST Framework, MySQL, Postman, JSON Web Token and Bootstrap

Youtube Clone   [Repository](#)

- User account registration, login and logout (Authentication & JWT)
- Users can facilitate search bar to search for specific YouTube Videos
- Integrated YouTube API to populate Embedded Video Player and play the Video selected by the User.
- Using the YouTube API and Embedded Video Player to show Related Videos populated by information provided by the selected video.
- Users can leave a Like or a Dislike on selected Videos.
- Utilized Javascript, React.js, Axios, Python, Django REST Framework, JSON web token, Youtube API and Google Charts.

Wedding Tracker   [Repository](#)

- I developed a single page application to register information sent to an email to track the amount of people watching the wedding stream using React.js, JavaScript, Tailwind, html

EDUCATION

Full Stack Developer   **OCT 2022**
devCodeCamp
I attended a project-based Full Stack Web Developer online program where I learned JavaScript fundamentals and building real- world applications using Python, Django REST Framework, JavaScript, Node.js, React.js, JSON web token, Git, API testing and deploying apps to production
